# NIKHIL GOLE

LEAD INFRA AND DEVOPS ENGINEER

## CONTACT

+91 8605766232

nikhilgole1010@gmail.com

At Post Valuth, Tal-Jaoli, Dist-Satara, Maharashtra – 415514

## SKILLS

- Amazon Web Services (AWS)
- Microsoft Azure
- Google Cloud Platform (GCP)
- DevOps & Automation
- GitLab CI/CD
- Azure DevOps
- Infrastructure Automation
- Containers & Virtualization
- Docker
- Proxmox VE
- Prometheus
- Grafana
- Node Exporter
- Windows Exporter
- Nginx
- SSL/TLS
- Cloudflare
- DNS Management
- PostgreSQL
- MySQL
- SQL Server

## PROFILE

Results-driven DevOps Engineer with expertise in Multi-Cloud Infrastructure, CI/CD Automation, Linux Administration, Monitoring, and Virtualization. Experienced in managing production environments, optimizing deployments, and ensuring high availability across enterprise applications.

## WORK EXPERIENCE

**Avinya Technologies** 2025 - PRESENT

Lead Infrastructure & DevOps Engineer

**Key Responsibilities**

- Managing production infrastructure across AWS, Azure, GCP and Proxmox platforms.
- Designing and implementing CI/CD pipelines for automated application deployment.
- Administering Linux and Windows production servers.
- Managing SSL certificates, DNS records and reverse proxy configurations.
- Maintaining PostgreSQL, MySQL and SQL Server environments.
- Supporting development teams for application deployments and infrastructure requirements.
- Managing monitoring and alerting solutions for infrastructure visibility.
- Handling cloud security, IAM permissions and access management.
- Ensuring high availability, performance and reliability of production systems.

**Major Achievements**

- Successfully managed and maintained production workloads across three cloud platforms.
- Automated application deployment process using GitLab CI/CD pipelines.
- Reduced deployment time through automation and standardized release workflows.
- Implemented centralized monitoring using Prometheus and Grafana.
- Migrated and hosted 40+ websites on self-managed Linux infrastructure.
- Improved system reliability through proactive monitoring and preventive maintenance.
- Managed enterprise SSO integrations using Azure Active Directory.
- Performed database migrations, backups and disaster recovery operations.

## PROJECTS

**Multi-Cloud Infrastructure Management Platform**
Technologies - AWS, Azure, GCP, Linux, Nginx, SSL, DNS
Responsibilities & Achievements

- Designed and managed production infrastructure across AWS, Azure and GCP environments.
- Implemented cloud security controls, IAM policies and access management.
- Managed Linux servers, networking, DNS and SSL infrastructure.
- Maintained highly available production environments supporting multiple applications.
- Optimized cloud resources for performance, scalability and cost efficiency.
- Provided L2/L3 infrastructure support and incident resolution.

**Enterprise CI/CD Automation Framework**
Technologies - GitLab CI/CD, GitLab Runner, Docker, Linux, PM2
Responsibilities & Achievements

- Designed and implemented end-to-end CI/CD pipelines for automated deployments.
- Automated build, test and release processes across multiple environments.
- Integrated deployment approvals, backup strategies and rollback mechanisms.
- Reduced deployment time and minimized manual intervention.
- Standardized release management and deployment workflows.
- Improved deployment reliability and application availability.

**Centralized Monitoring & Observability Platform**
Technologies - Prometheus, Grafana, Linux, Windows Server
Responsibilities & Achievements

- Implemented centralized monitoring for cloud and on-premise infrastructure.
- Designed Grafana dashboards for infrastructure and application visibility.
- Monitored CPU, Memory, Disk, Network and Service Health metrics.
- Configured alerting mechanisms for proactive incident management.
- Improved system uptime through real-time monitoring and analysis.
- Enabled faster root cause analysis and troubleshooting.

**Enterprise Web Hosting & Migration Platform**
Technologies - Ubuntu, Nginx, MySQL, PHP-FPM, SSL
Responsibilities & Achievements

- Successfully migrated 40+ production websites to self-managed infrastructure.
- Configured Nginx virtual hosts, SSL certificates and DNS routing.
- Performed database migrations with minimal downtime.
- Optimized server performance and application availability.
- Managed production hosting environments and troubleshooting activities.
- Implemented backup and recovery procedures for hosted applications.

**Virtualization & Private Cloud Infrastructure**
Technologies - Proxmox VE, Linux, Storage, Networking
Responsibilities & Achievements

- Built and managed virtualization infrastructure using Proxmox VE.
- Provisioned and maintained virtual machines for development and production workloads.
- Implemented VM backup, snapshot and disaster recovery strategies.
- Configured storage, networking and resource allocation policies.
- Optimized infrastructure utilization and operational efficiency.
- Supported scalable infrastructure growth and workload management.

## EDUCATION

**Bachelor of Science (B.Sc)**
Shivaji University, Kolhapur
